

Mission of the Program:

The mission of the NC State University Facilities Division Historically Underutilized Business (HUB) program is to develop and maintain a highly credible and effective effort to encourage the expansion of HUB participation in the design and construction of the campus physical environment. Our program will be measured by how we:

- Inform the HUB community of contracting opportunities.
- Provide opportunities for the HUB community to learn more about the bidding process and requirements.
- Encourage participation of HUB designers and contractors through our selection process.
- Increase the participation and success rate of HUB designers and contractors completing work.

Mission of the Committee:

The mission of the NC State University Historically Underutilized Business Advisory Committee is to provide advice and counsel to the NC State Facilities Division with the intent to reach and exceed the State of North Carolina's goal for HUB participation on building projects.

Charge of the Committee:

1. To advise on the ways that the university can improve communication with HUB organizations.
2. To act as liaisons to the minority design and contracting community, encouraging minority and women-owned businesses to obtain certification.
3. To make suggestions on processes and procedures that will improve the access and opportunity of HUB designers and contractors on formal and informal capital projects at NC State.
4. To assist NC State to become more aware of the available services offered by HUB designers and contractors.
5. To provide objective feedback to the Facilities Division concerning its performance in achieving the mission.
