Pursuant to the statute, this form gathers information about the contractors seeking to qualify for the work and provides a general format for the prequalification criteria. **Completing this questionnaire does not guarantee prequalification**. Evaluation of the submittal shall be performed by the prequalification committee in accordance with GS 143-128.1, 143-135.8 and the State of NC Prequalification Policy (attached).

Contractors are not to use the blank template from the SCO website but to use the project specific form from the Prequalification Committee.

**Project Description:** (An in-depth narrative of the details of the project, site, trades, LEED, etc.)

This project will remove the existing rigging equipment above the Stewart Theater and install all new assemblies. The new assemblies will include static, manually and electrically operated equipment assemblies, systems and components required for locating scenic, acoustic, lighting, and masking elements in variable vertical and horizontal planes. The project will install a tension wire grid consisting of frames supporting a woven wire rope tension grid. The grid shall provide a serviceable walking surface for technical personnel for access to and hanging locations for performance lighting and performance equipment. The work also includes the installation electrical boxes and conduit for connections for the motorized equipment associated with the rigging. Some retrofitting of the fire protection piping and valves for the sprinkler system will also be required.
